## Climate Depot Special Report: A-Z Climate Reality Check — Sub-Prime Science Exposé: ‘The claims of the promoters of man-made climate fears are failing’ — Presented to UN Summit

**'The scientific reality is that on virtually every claim -- from A-Z -- the claims of the promoters of man-made climate fears are failing. The A-Z report includes key facts, peer-reviewed studies and the latest data and developments with links for further reading, on an exhaustive range of man-made global warming claims'**

### Special Report

Below is the Introduction to the report. Full report is available [here](#).

#### INTRODUCTION:

Many of the proponents of man-made global warming are now claiming that climate change is worse than they predicted. According to an October 18, 2011 [Daily Climate](#) article, global warming activists claim that the “evidence builds that scientists underplay climate impacts” and “if anything, global climate disruption is likely to be significantly worse

than has been suggested.”

But this exclusive Climate Depot exhaustive *A-Z Climate Reality Check* report on the scientific reality of the failure of man-made global warming shatters any such illusions that the climate is “worse than we thought.” As the real world evidence mounts that global warming claims are failing, the climate activists have ramped up predictions of future climate change impacts to declare that it “worse than we thought.” But a prediction or projection of 50-100 years into the future is not “evidence.” Recent scientific data and developments reveal that Mother Nature is playing a cruel joke on the promoters of man-made climate fears.

**The scientific reality is that on virtually every claim — from A-Z — the claims of the promoters of man-made climate fears are failing, and in many instances the claims are moving in the opposite direction. The global warming movement is suffering the scientific death of a thousand cuts. This Climate Depot special report categorizes and indexes the full range of climate developments in a handy A-Z reference guide. The A-Z report includes key facts, peer-reviewed studies and the latest data and developments with links for further reading, on an exhaustive range of man-made global warming claims.**

The [Antarctic sea ice](#) extent has been at or near record extent in the past few summers and the [ice is expanding](#), the [Arctic](#) has [rebounded](#) in recent years since the low point in 2007, [polar bears are thriving](#), sea level is not [showing acceleration](#) and is [actually dropping](#), [Cholera](#) and [Malaria](#) are failing to follow global warming predictions, Mount [Kilimanjaro melt fears](#) are being made a mockery by [gains in snow cover](#), global [temperatures have been holding steady](#) for a decade or more and many scientists are predicting global cooling is ahead, [deaths due to extreme weather](#) are radically declining, global tropical cyclone [activity](#) is near historic lows, the [frequency of major U.S. hurricanes](#) has [declined](#), the oceans are [missing their predicted heat content](#), big [tornados have dramatically declined](#) since the 1970s, [droughts are not historically unusual nor caused by mankind](#), there is [no evidence we are currently having unusual weather](#), [scandals continue to rock the climate fear movement](#), the UN IPCC has been exposed as being a [hotbed of environmental activists](#), former Vice President Al Gore is now under siege by his fellow global warming activists for attempting to link every bad weather event to man-made global warming and [scientists from around the world continue to dissent](#) from man-made climate fears at a rapid pace.

## **Climate Depot's new A-Z report reveals that the great man-made global warming catastrophe that was predicted – has been cancelled.**

In addition to the scientific collapse of anthropogenic global warming fears, the political collapse has been just as stunning. President Obama has been criticized by former Vice President Al Gore for failing to do enough when it comes to climate change legislation. The now defunct and “scientifically meaningless” Congressional climate bill failed because the Democrats realized it was political suicide. The new political expediency in Washington is global warming skepticism. The UN global warming treaty process lay in shambles. See: Democrat Walter Russell Mead analyzes Gore: Gore steered the green movement ‘into a tsunami of defeat that...will loom as one of the greatest failures of civil society in all time.’

capitalism’ due to COVID – Virus has given ‘opportunity’ for ‘equality & sustainability’ & fighting climate

Amazon unveils first recipients of \$2 billion climate investment program – ‘Holistic approach to tackling escalating climate impacts’

Proponents of anthropogenic climate change have been reduced to making outlandish claims of a mythical 97% or 98% consensus. See: Global Warming: A ‘98% Consensus Of Nothing’: ‘Only shameless activists or statistically ignorant claim that survey of 77 anonymous scientists’ is proof of 98% ‘consensus’. Once esteemed science groups like the National Academy of Sciences (NAS) have now corrupted and have used taxpayer money to lobby for the passage of climate bills. See: Ralph Cicerone’s Shame: NAS Urges Carbon Tax, Becomes Advocacy Group — ‘political appointees heading politicized scientific institutions that are virtually 100% dependent on gov’t funding’ & NAS Pres. Ralph Cicerone Turns Science Org. into political advocacy group: \$6 million NAS study is used to lobby for global warming bill & MIT’s Richard Lindzen: ‘Cicerone of NAS is saying that regardless of evidence the answer is predetermined. If gov’t wants carbon control, that is the answer that the NAS will provide’

## **Movement ‘was bound to fail’**

A movement that had Al Gore – one of the most divisive political figures – as the face of the movement, was bound to fail. A movement that utilized the scandal ridden United Nations – which is massively distrusted by the American people – as the repository of science, was doomed to fail. Gore and the UN IPCC are now reduced to pointing to every storm, flood, hurricane or tornado as proof of man-made global warming. The UN has been reduced to blaming man-made global warming for prostitution. See: Climate Astrology — ‘It Has Been Foretold’ of Extreme Weather: ‘UN IPCC science has a status similar to interpretations of Nostradamus and the Mayan calendars’ & Climate Astrology borrows from the past: ‘Before That Witch Moved Into The Neighborhood, We Never Had Bad Weather Or Disease’

But a scientific moment of clarity is now prevailing: The UN and the U.S. Congress do not have the power to legislate, tax or regulate the weather. See: [Princeton University Physicist Dr. Will Happer: ‘The idea that Congress can stop climate change is just hilarious’ – Warns of ‘climate change cult’ – July 8, 2009](#) – Prominent scientists continue to challenge the alleged “consensus.” See: [Nobel Prize-Winning Physicist Who Endorsed Obama Dissents! Dr. Ivar Giaever Resigns from American Physical Society Over Group’s Promotion of Man-Made Global Warming](#)

### **‘Climate change is governed by hundreds of factors, or variables’**

The idea that CO<sub>2</sub>, a trace essential gas in the atmosphere that humans exhale from their mouth, is the main climate driver is now being challenged by peer-reviewed studies, data and scientists from around the globe. It is not simply, [the sun or CO<sub>2</sub>](#) when looking at global temperatures, it is the Sun, volcanoes, tilt of the Earth’s axis, water vapor, methane, clouds, ocean cycles, plate tectonics, albedo, atmospheric dust, Atmospheric Circulation, cosmic rays, particulates like Carbon Soot, forests and land use, etc. Climate change is governed by hundreds of factors, or variables, not just CO<sub>2</sub>.

Professor Emeritus of Biogeography Philip Stott of the University of London explained the crux of the entire global warming debate when he rebutted the notion that CO<sub>2</sub> is the main climate driver.

“As I have said, over and over again, the fundamental point has always been this: climate change is governed by hundreds of factors, or variables, and the very idea that we can manage climate change predictably by understanding and manipulating at the margins one politically-selected factor (CO<sub>2</sub>), is as misguided as it gets,” Stott [wrote](#).

Even the global warming activists at RealClimate.org admitted to this key climate reality in [a September 20, 2008 article](#). “The actual temperature rise is an emergent property resulting from interactions among hundreds of factors,” RealClimate.org explained.

The global warming movement continues to lose scientists, many formerly with the UN IPCC. See: [More Than 1000 International Scientists Dissent Over Man-Made Global Warming Claims – Challenge UN IPCC & Gore](#)

The future does not look bright for global warming activists as more scandals continue to rock the movement. See: [Climate Depot’s Exclusive Round Up of Climategate 2.0 – Read about the most](#)

comprehensive report on the latest global warming scandal – Even warmists are lamenting that Climate 2.0 may be ‘devastating’: ‘These [emails] sound worse than I thought at first – their impact will be devastating’

MIT climate scientist Dr. Richard Lindzen has observed that “Ordinary people see through man-made climate fears — but educated people are very vulnerable.”
